

DX15AP featured 15inch low-frequency transducers with high-power configuration. Profit by cabinet natural extension of the transmission line design, effectively increase and improves the low-frequency response and sensitivity, without any other increase other subwoofer extra burden can be reach to 97dB, maximum 131dB. DX15AP featured CLASS-D AMP, provided small size, light weight, high efficiency, lower exothermic characteristic.

DX15AP also featured DSP processor with processing parameters, can obtain carefully processed frequency response, corrected phase.
